Here is a quick refresher for you on Critical Illness Insurance

Critical Illness Insurance is one of the fastest growing employee benefits. In Canada today, the probability of being diagnosed with a serious illness is much higher than a premature death. Plus, most of those who suffer from a serious illness recover and return to work.

This benefit will provide someone with peace of mind so they can focus on their recovery and return to productivity. It provides a tax-free lump sum payment to spend any way they need.

All Eligible EPC Members Will Now Have Access to a Long Term Care Insurance plan underwritten by MyDignity Homecare Assistance Plans

Ask yourself...

“WHO is going to take care of you when you can no longer take care of yourself and WHERE is the money going to come from”.

These plans are available for those age 18-80 to apply, residing anywhere in Canada! Coverage can be for a single or a couple

What Assistance Is Available To You?

The long term care assistance options are limited. One can rely on the government, rely on their family and friends, plan with insurance, or pretend it won't happen and hope for the best. Canadians would consider the differences between government help and planning with insurance as the two most viable options.

In summary, long term care insurance provides:

- The necessary resources when you are no longer able to care for yourself
- Freedom to choose and control the type of care you receive
- Peace of mind knowing that the financial cost of your care is taken care of

In conclusion, insurance is the logical solution as government assistance is limited at best. Unfortunately, many people mistakenly want to believe that the government will take care of them when the time comes that they can no longer take care of themselves.
